Professional Summary

Software Engineer with expertise in **Django**, **FastAPI**, **React**, **PostgreSQL**, **Redis**, and scalable backend architecture. Experienced in designing, building, and deploying production grade web applications from concept to production. Successfully delivered **AlphaPK ERP**, a full featured enterprise resource planning system, and **GazaBridge**, a production ready humanitarian platform. Strong foundation in REST APIs, authentication, background task processing, caching, database design, and clean software architecture.

Technical Skills

Languages: Python, SQL, JavaScript
Frontend: React, Tailwind CSS, HTML5, CSS3
Backend: Django, Django REST Framework (DRF), FastAPI, REST APIs, GraphQL, JWT Authentication, RBAC
Databases: PostgreSQL, MySQL, SQLite
Caching & Messaging: Redis, Celery, Django Channels
AI Engineering: OpenAI SDK, Prompt Engineering, LLM Applications, AI Workflow Automation (n8n)
Tools & Platforms: Git, GitHub, Postman, Docker, Render, Vercel, Netlify, VS Code, Cursor, Claude Code
System Design: Scalable Architecture, REST API Design, Database Modeling, Caching Strategies, Asynchronous Processing, Event Driven Architecture, Message Queues, Authentication & Authorization

Professional Experience

Backend Software Engineer – GazaBridge 2026 – Present
Django REST Framework, *React*, *PostgreSQL* *Production Deployment*

- Designed and deployed a production grade humanitarian platform using **Django REST Framework**, **React**, and **PostgreSQL** with a decoupled frontend/backend architecture.
- Implemented secure authentication with **JWT**, Redis based refresh token rotation, token blacklisting, RBAC, and Google OAuth.
- Utilized **Redis** for response caching, Celery message brokering, custom sliding window rate limiting, and Django Channels Pub/Sub for real time WebSocket communication.
- Deployed the backend on **Render** (Gunicorn + WhiteNoise) and the frontend on **Netlify**, with production ready CORS, CSRF, and environment-based configuration.

Full-Stack Software Engineer – AlphaPK ERP 2026 – Present
Django REST Framework, *React*, *PostgreSQL* *Production Deployment*

- Built and deployed a full stack ERP system covering purchasing, inventory, billing, cash flow, financial ledger, reporting, and customer management.
- Designed a layered architecture across eight Django apps using models, selectors, services, serializers, permissions, and views.
- Implemented JWT authentication, FIFO inventory costing, GST/WHT tax automation, audit trails, soft deletes, and PDF invoice generation with **WeasyPrint**.
- Deployed the backend on **Render** and frontend on **Vercel** using PostgreSQL and secure environment-driven production configuration.

Education

University of Agriculture Faisalabad (UAF) 2023 – 2027 (Expected)
Bachelor of Science in Software Engineering (CGPA: 3.40 / 4.00) *Faisalabad, Pakistan*

Intermediate in Computer Science (ICS) 2021 – 2023
FSc (ICS) – 916 / 1100 Marks *Faisalabad, Pakistan*

Matriculation (Science) 2019 – 2021
1076 / 1100 Marks *Faisalabad, Pakistan*

Certifications

- Google Prompting Essentials (Google) | Credential ID: 8N1DAWL45DA9
- Foundations of Project Management (Google) | Credential ID: LVQTVXN23NKM
- CS50 (Harvard University) | Credential ID: 3ebd4ffe-1546-484c-857e-a1ae9870172e
- Speed Up Data Analysis and Presentation Building (Google) | Credential ID: BO6IMQKMCE9I
