Professional Summary

Software Engineer with expertise in **Django**, **FastAPI**, **React**, **PostgreSQL**, **Redis**, and scalable backend architecture. Experienced in designing, building, and deploying production grade web applications from concept to production. Successfully delivered **AlphaPK ERP** and **GazaBridge**. Strong foundation in REST APIs, authentication, background task processing, caching, database design, and clean software architecture.

Technical Skills

Languages: Python, SQL, JavaScript **Frontend:** React, Tailwind CSS, HTML5, CSS3
Backend: Django, DRF, FastAPI, REST APIs, GraphQL, JWT Authentication, RBAC
Databases: PostgreSQL, MySQL, SQLite **Caching & Messaging:** Redis, Celery, Django Channels
AI Engineering: OpenAI SDK, Prompt Engineering, LLM Applications, AI Workflow Automation (n8n)
Tools: Git, GitHub, Postman, Docker, Render, Vercel, Netlify, VS Code, Cursor, Claude Code
System Design: Scalable Architecture, REST API Design, Database Modeling, Caching Strategies, Async Processing, Event Driven Architecture, Message Queues, Auth & Authorization

Professional Experience

Backend Software Engineer – GazaBridge 2026 – Present
Django REST Framework, React, PostgreSQL *Production Deployment*

- Designed and deployed a production grade humanitarian platform using **Django REST Framework**, **React**, and **PostgreSQL**, with secure **JWT** authentication, Redis based refresh token rotation, RBAC, and Google OAuth.
- Utilized **Redis** for response caching and Celery message brokering, and Django Channels Pub/Sub for real time WebSocket communication.

Full-Stack Software Engineer – AlphaPK ERP 2026 – Present
Django REST Framework, React, PostgreSQL *Production Deployment*

- Built and deployed a full stack ERP system covering purchasing, inventory, billing, cash flow, financial ledger, reporting, and customer management, with a layered architecture across eight Django apps.
- Implemented JWT authentication, FIFO inventory costing, GST/WHT tax automation, and PDF invoice generation with **WeasyPrint**.

Projects

Datavo – AI Database Schema Architect | *FastAPI, React, OpenAI SDK*

- Developed an AI system to generate structured database schemas from user requirements, producing structured JSON outputs with entities, relationships, and constraints. Implemented efficient prompt architecture reducing token usage and hallucination risk.

PathWeaver – AI Job Automation System | *Django, React, Celery, Redis, PostgreSQL*

- Built an end to end job automation system that scrapes, filters, and analyzes job listings using AI, with resume parsing, job matching, and automated scoring.

Education

University of Agriculture Faisalabad (UAF) 2023 – 2027 (Expected)
Bachelor of Science in Software Engineering (CGPA: 3.40 / 4.00) *Faisalabad, Pakistan*

Intermediate in Computer Science (ICS) 2021 – 2023
FSc (ICS) – 916 / 1100 Marks *Faisalabad, Pakistan*

Certifications

Google Prompting Essentials (Google) | ID: 8N1DAWL45DA9
Foundations of Project Management (Google) | ID: LVQTVXN23NKM
CS50 (Harvard University) | ID: 3ebd4ffe-1546-484c-857e-a1ae9870172e
Speed Up Data Analysis & Presentation Building (Google) | ID: BO6IMQKMCE9I
