Education

University of Agriculture Faisalabad (UAF) 2023 – 2027 (Expected)
Bachelor of Science in Software Engineering (CGPA: 3.40 / 4.00) *Faisalabad, Pakistan*

- **Relevant Coursework:** Data Structures & Algorithms, Database Systems, Software Engineering, Object-Oriented Programming, Operating Systems, Computer Networks, Artificial Intelligence

Intermediate in Computer Science (ICS) 2021 – 2023
FSc (ICS) – 916 / 1100 Marks *Faisalabad, Pakistan*

Matriculation (Science) 2019 – 2021
1076 / 1100 Marks *Faisalabad, Pakistan*

Experience

Backend Developer (Freelance & Personal Projects) 2024 – Present
Django, FastAPI, Agentic AI Systems *Faisalabad, Pakistan*

- Developed scalable REST APIs using Django and FastAPI, implementing authentication (JWT), database design, and CRUD operations for SaaS-style applications.
- Built AI-powered workflow automation systems using OpenAI SDK and n8n, integrating third-party APIs to streamline business processes for startups.
- Designed and optimized relational databases (PostgreSQL/MySQL), improving query efficiency and backend performance.
- Implemented secure backend architectures with role-based access control, input validation, and API security best practices.

Home Tutor 2023 – Present
Computer Science & Mathematics Instructor *Faisalabad, Pakistan*

- Delivered structured one-on-one instruction in Computer Science and Mathematics, improving students' academic performance and conceptual understanding.

Projects

School Management System (SaaS) | *Django, Python, SQLite, RBAC Architecture*

- Designed and developed a multi-branch SaaS-based school management system with 7 role-based dashboards (Principal, Manager, Accountant, Teacher, Student, Parent, Employee).
- Built a finance-focused decision dashboard to monitor income, expenses, and institutional financial flow across branches.
- Implemented strict Role-Based Access Control (RBAC) with structured permission management and activity logging.
- Architected modular Django apps for scalability and real-world institutional workflow simulation.

Datavo – AI Database Schema Architect | *FastAPI, React, OpenAI SDK, JSON*

- Developed an AI-powered system that generates structured database schemas through requirement clarification and iterative refinement.
- Designed a single-agent dynamic prompt architecture to reduce token cost, hallucination risk, and orchestration complexity.
- Implemented structured JSON-based schema outputs including entities, relationships, constraints, and keys.
- Optimized prompt engineering and response formatting for deployable, real-world AI usage.

UzairMart – Django eCommerce Platform | *Django, Python, SQLite, Authentication System*

- Built a fully functional eCommerce application with product browsing, cart management, and secure user authentication.
- Engineered complex add-to-cart backend logic handling quantity updates, duplicate items, and persistent cart state.
- Implemented email verification and secure token-based password reset workflow.
- Strengthened debugging and exception-handling skills through iterative backend refactoring.

BusinessPulse – AI Decision Support System | *Next.js, JavaScript, Data Analysis, Excel/JSON Processing*

- Developed a SaaS-oriented decision support system for startups to analyze product performance and customer complaints.
- Designed scenario-based analysis allowing business owners to test “what-if” situations using structured data inputs.
- Implemented Excel upload and JSON ingestion pipelines for real-world business data processing.
- Focused on pattern detection, trend identification, and actionable insights without overengineering or vector databases.

Technical Skills

Languages: Python, SQL, JavaScript (Basic)
Backend Development: Django, FastAPI, REST API Development, JWT Authentication, Role-Based Access Control
AI & Automation: OpenAI SDK, Agentic AI Systems, Workflow Automation (n8n)
Databases: PostgreSQL, MySQL, SQLite
Digital Marketing: Facebook Ads (Hands-on), SEO, Content Strategy, Script Writing
Tools & Platforms: Git, GitHub, VS Code, Postman
